Professional Summary

Software Engineer and Full Stack Developer specializing in MERN stack development with experience building scalable production-ready web applications. Skilled in developing responsive frontend interfaces using React.js and robust backend services using Node.js and Express.js. Strong foundation in Data Structures, REST API design, and performance optimization with hands-on internship experience in Agile development environments to deliver efficient real-world solutions.

Work Experience

Full Stack Developer Intern

07/2025 – 10/2025

Instlytics Consulting LLP — Remote

- Developed responsive and high-performance frontend interfaces using React.js, improving usability and ensuring cross device compatibility.
- Designed and implemented a full-stack **Learning Management System (LMS)** using the MERN stack(MongoDB, Express.js, React.js, Node.js).
- Developed RESTful APIs for course management, user authentication, and learning progress tracking enabling seamless frontend-backend communication with secure authentication and role-based authorization for students, instructors, and administrators using JWT.
- Collaborated within Agile development workflows including sprint planning, feature development, debugging, and deployment cycles and Utilized Git and GitHub for version control, pull requests and collaborative code integration.

Projects

CareerVision AI (AI-Powered Career & Interview Platform)

[Demo](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, FastAPI, Gemini AI, PyTorch, SpeechBrain, spaCy, OpenCV

- Implemented a full-stack career platform providing personalized career guidance, resume scoring, and mock interview evaluation with analytics and Designed responsive React.js dashboards with dynamic state management.
- Engineered Resume Builder & ATS Scoring system with live preview, automated PDF export and feedback against job descriptions.
- Built AI Mock Interview system with adaptive questioning, proctoring and structured performance analytics and Integrated Job Recommendation Engine using Adzuna API and JSearch RapidAPI with web scraping.
- Built RESTful APIs using Node.js and Express.js handling authentication, user profiles, and analytics workflows and Implemented MongoDB-based data architecture for efficient user and session management.

HealthEase (Medical Appointment Management System)

[Demo](#)

Tech Stack: MongoDB, Express.js, React.js, Node.js

- Built a full-stack medical appointment and prescription management web app using React.js, Node.js, Express.js and MongoDB, implementing modular RESTful APIs and a responsive UI.
- Implemented secure, role-based authentication and authorization (patients/doctors/admin) with JWT, hashed passwords, and protected routes, enforcing validation and access control at both API and UI layers.
- Designed and optimized data models for patients, doctors, appointments and prescriptions in MongoDB, including query optimization, indexing where needed, and clean separation of service/controller layers.
- Configured environment-based settings and production-ready error handling/logging, enabling smooth deployment, easier debugging, and maintainable code following best practices for folder structure and reusable components.

Technical Skills

Programming Languages: Java, C++, Python, JavaScript

Web Development: HTML, CSS, React.js, Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Postman, VS Code, Render, Vercel

Core Subjects: DBMS, DSA, OOPs

Education

Bachelor of Technology

2022 – Present

G.L. Bajaj Institute of Technology and Management, Greater Noida

CGPA: 7.7

Intermediate

2021

B N S D Inter College, Kanpur

Percentage: 83

High School

2018

B N S D Inter College, Kanpur

Percentage: 82
